

I am writing to tell your organization that I and many others feel very strongly about FM stations such as Air 1 and FM88.1 being interfered with by the LPFM. These broadcasting stations are changing peoples lives for the better every single day! They are positive, encouraging and so informative. A huge asset to the airwaves of today which is typically so slammed with junk. I have heard countless testimonies of how people have been touched by the wonderful programming on both of these stations and I know it would be a huge tragedy to lose them. Please do not allow these stations to be limited or done away with! Thank you for hearing me.
